ALL ON MOBILE HELPS COMPANIES MANAGING FLEETS OF VEHICLES TO OVERCOME THEIR CHALLENGES

OUR SOLUTION

Fleet vehicle administration is arguably on of the most demanding areas of mobile workforce management. All On Mobile helps companies managing fleets of vehicles to overcome their specific challenges associated with the administration of rolling stock

All On Mobile's solution for fleet management streamlines time consuming manual processes, creating greater efficiency and productivity while supporting compliance. It allows drivers to perform daily Driver Walkaround Vehicle Checks as well as accessing other useful forms including Bump Cards and Drivers Hours.

Using All On Mobile as your mobile fleet management solution brings many benefits, including:

SCALABILITY
Enterprise level solution with options for smaller fleets

REPORTING
Powerful reporting dashboard functionality against drivers, vehicles, time, location, users etc.

INTEGRATION
Open API for integration into existing Fleet Management solutions (create a mobile front-end for your existing back office system)

PAPERLESS
Replace paper forms for all processes including Vehicle Checks, Drivers Hours, Accident Reporting and more

EASY TO USE
Increases productivity of fleet team and drivers through intuitive, simple forms

WORKFLOWS
Improves workflows through the Rules Engine e.g. automatic alerting, creation of new jobs

COMPLIANCE
Improves compliance by ensuring necessary forms are completed when required e.g. Vehicle Checks

SECURE
Can ensure that all necessary data is completed through mandatory fields

CUSTOMISABLE
Highly configurable, new forms can be built out depending on the requirements of the Fleet

RELIABLE
Enterprise Level capability, can handle unlimited number of jobs, drivers, vehicles, locations etc.

TELEMATICS
AOM partner with TomTom and Masternaut to offer integrated telematics and job management solutions

DVSA RECOGNITION
Capture and report on data in a simple way, automate reporting, keep vehicles on the road longer

SUPPOORT
AOM provide support and implementation services to ensure accurate deployment

FORS & CLOCS
Full support for FORS (Fleet Operator Recognition Scheme) and CLOCS (Construction Logistics & Community Safety)

QUICK SET-UP
Can be rolled out immediately

SAAS MODEL
Transparent and simple SaaS (Software as a Service) payment model

all on mobile

OUR WORK

All On Mobile is used by leading UK organisations to manage their fleets more efficiently. Our customers chose our product because of their quality and ease of use.

DVSA EARNED RECOGNITION

- Capture and report on data in a straight forward way
- Automate and audit to support DVSA Earned Recognition
- Increases fleet efficiency
- Improves compliance in maintaining your O-Licence
- Helps keep vehicles on the road for longer
- Full consultancy advises how to deploy All On Mobile to support DVSA Earned Recognition

All On Mobile partners with leading telematics company, TomTom.

CUSTOMER HIGHLIGHT

All On Mobile were approached by one of the UK's largest construction firms to enable them to manage their fleet of over 2000 vehicles. They use All On Mobile for:

- Daily driver walkaround checks
- Accident Reporting
- Drivers Hours

One of their key goals is to achieve Earned Recognition (an initiative set up by DVSA to allow Fleet Operators to regulate themselves and provide relevant information to the DVSA).

The benefits of this are:
- Decrease in vehicles being stopped by the DVSA
- Can cost on average £4000 per stopped vehicle per day

Additional benefits:
- Increase efficiency of contracts
- Reduce vehicle down time
- Reduction in admin
- Improve compliance for O-Licence

Other:
- Used as a standalone application
- Future plans to integrate with existing Fleet Management solution via open, full function API
